Nationality: Indian — Visit Visa

Languages: English, Hindi, Malayalam

Professional Summary

Detail-oriented QA Engineer with **3+ years of experience** in manual and automation testing of banking, financial, and FinTech applications. Experienced in **test planning, test case design, test execution, regression testing, integration testing, defect management, API testing, and SQL-based data validation.**

Hands-on experience testing web and mobile applications, validating business-critical workflows, and collaborating with developers, product managers, and stakeholders in Agile environments. Knowledge of Selenium WebDriver, TestNG, Jira, and modern QA practices with a strong focus on software quality and continuous improvement.

Technical Skills

Testing Skills: Test Case Design, Test Execution, Functional Testing, Regression Testing, Integration Testing, System Testing, UAT Support

Automation: Selenium WebDriver, TestNG, Automation Testing (Basic)

Programming: Java, SQL (Data Validation)

API Testing: Postman, REST API Validation

Tools: Jira, Confluence, Git, Browser DevTools

Methodologies: SDLC, STLC, Agile (Scrum), Defect Lifecycle

Testing Types: Functional Testing, System Testing, Regression Testing, Integration Testing, Ad-hoc Testing, Release Testing

Domain: Banking, FinTech, Payment Systems, Credit Workflow Testing, Enterprise Applications

Professional Experience

Software Test Engineer — Zilmoney (US-based FinTech Platform)

Sep 2023 – Mar 2026

Remote / UAE / India

- Designed and executed **manual and automated test cases** for banking and financial modules.
- Performed **end-to-end testing of payment workflows, credit operations, and financial APIs.**
- Participated in **requirement analysis and test scenario creation.**
- Logged and tracked defects using **Jira** with proper severity and priority.
- Conducted **SQL-based backend validation** for transaction accuracy and data integrity.
- Executed **regression and integration testing** across release cycles.
- Prepared **test reports and status updates** for stakeholders.
- Collaborated with developers and product teams for issue resolution and retesting.

Software Test Trainee — Luminar Technolab

Oct 2022 – Jun 2023

Kochi, India

- Performed **manual functional and regression testing** of web applications.
- Created and executed **test cases based on requirements.**
- Gained exposure to **API testing and SQL validation.**
- Participated in **Agile ceremonies and defect tracking.**

Key Projects

ZILBANK – Digital Banking & Credit Platform

- Tested **core banking features** including transactions, accounts, and credit workflows.
- Designed reusable **test scenarios for payment processing.**

- Performed **API validation and SQL-based backend verification**.
- Ensured system stability through **continuous regression testing**.

ZILMaster – Enterprise Admin System

- Validated enterprise workflows with **role-based access control**.
- Tested **integration between modules and backend services**.
- Ensured **functional correctness and UI consistency**.
- Contributed to **test design and requirement analysis**.

ZIL Admin – SaaS-Based HR & Payroll Management System

- Tested **HR, payroll, and attendance management modules** in a SaaS environment.
- Validated **employee lifecycle workflows** including onboarding, salary processing, and leave management.
- Performed **functional and integration testing** across multiple modules.
- Executed **API validation using Postman** for backend services.
- Identified and tracked defects using **Jira** and collaborated with developers for resolution.

Education

Bachelor of Technology (B.Tech)

Certification

IAO Certified Software Tester (Manual and Automation Testing)
